Can't find your fish in the regulations?

Florida's coastal waters are home to thousands of marine species, and the majority of these species have no specific regulations with regard to bag limits, size limits, gear restrictions or closed seasons. These species are often referred to as "unregulated species," although the name can be a bit misleading. State law provides that for any marine species that does not have specific regulations, harvesting more than 100 pounds or two fish (whichever is the greater amount) constitutes a commercial quantity and requires a commercial license. This means the recreational harvest limit for any unregulated species is 100 pounds or two organisms if the combined weight of the two organisms exceeds 100 pounds.

Examples of "unregulated species" include:

Ladyfish, bonito, menhaden, white grunt, southern stingray, gulf kingfish (whiting), pinfish, Atlantic croaker, jack crevalle, cero mackerel, hardhead catfish, gafftopsail catfish and blackfin tuna.

- ▲ Must remain in whole condition (removal of gills and guts allowed).
- ◆ Measured as total length. Total length is the straight line distance from the most forward part of the head with the mouth closed to the farthest tip of the tail with the tail compressed or squeezed together while the fish is lying on its side.

- State regulations apply in federal waters.
- Additional gear rules apply, please see: MyFWC.com
- † Harvest prohibited by or with the use of any multiple hook (any hook with two or more points and a common shaft) in conjunction with live or dead natural bait.
